Subject Index of Volume B5

Acid urease
  analytical application of immobilized, for urea in flow streams, 241
Actuator material
  Ir oxide as, for ISFET-based sensor–actuator system, 47
Air pollutant
  H_2S monitoring as, with Ag-doped SnO_2 thin-film sensors, 21
Aluminium
  behaviour of hydrogen, nitrogen and oxygen impurities in B carbide and Al dodecaboride, 261

Bioanalysis
  with surface plasmon resonance, 79
Biomolecules
  reproducible electrodeposition of, for fabrication of miniature electroenzymatic biosensors, 85
Biosensing
  of cholesterol with use of split-flow enzyme thermistor, 249
  fiber optic, based on molecular recognition, 1
Bismuth
  new technique for preparation of highly sensitive hydrogen sensors based on $SnO_2(Bi_2O_3)$ thin films, 253
Boron
  behaviour of hydrogen, nitrogen and oxygen impurities in B carbide and Al dodecaboride, 261

Cadmium
  CdS films obtained by graphoepitaxy and investigation of some of their properties, 257
Calcium
  $CaZrO_3$-type hydrogen and steam sensors; trial fabrication and their characteristics, 145
  ISFETs with covalently bound monolayer membrane; example of Ca detection, 67
Calorimetric gas sensor
  new-type, using temperature characteristics of piezoelectric quartz crystal fitted with noble metal catalyst film, 211
Capacitance charges
  new type of CO_2 gas sensor based on, 97
Carbon dioxide
  new type of CO_2 gas sensor based on capacitance charges, 97
Carbon monoxide
  equilibrium and non-equilibrium conductance response of sintered SnO_2 samples to CO, 103
  new CO sensor based on hydrophobic CO oxidation catalyst, 91
Catalyst
  new CO sensor based on hydrophobic CO oxidation, 91
Catalytic filtering
  enhancement of MOS gas sensor selectivity by 'on-chip', 231
Chemical sensors
  implementing, in industry; novel approaches, 75
  two-dimensional and three-dimensional interdigital capacitors as basic elements for, 223
Chlorinated hydrocarbon gas sensor
  planar integrated, on Si substrate, 199
Cholesterol
  biosensing of, with use of split flow enzyme thermistor, 249
Computational enhancement
  of MOS gas sensor selectivity, 193
Conductance response
  equilibrium and non-equilibrium, of sintered SnO_2 samples to CO, 103
Corrosive solutions
  Ir oxide thin-film stability in high-temperature, 165

Diffusion limiting membranes
  universal on-wafer fabrication technique for, for use in microelectrochemical amperometric sensors, 71
Diisopropyl methylphosphonate
  selective detection of nitrogen dioxide and, with IGEFET, 37

Electrical permittivity
  humidity sensing properties and, of new photosensitive polyimides, 161
Electrochemical sensors
  fabrication and characterization of Pt/ceramic, 121
Electrode(s)
  potentiometric response of PVC/crown ether membrane, to nonionic organic compounds, 171
Electrodeposition
  reproducible, of biomolecules for fabrication of miniature electroenzymatic biosensors, 85
Electroenzymatic biosensors
  reproducible electrodeposition of biomolecules for fabrication of, 85
Electroenzymatic glucose sensor
  fabricated on flexible substrate, 139
Electrolyte
  characteristics of thin-film LaF_3 solid, for oxygen sensing, 149
Electronic effects
  surface chemistry and, of O_2, NO and NO/O_2 on SnO_2, 189
Enzyme thermistor
  biosensing of cholesterol with use of split-flow, 249
Enzyme-thermistor detector
  calorimetric flow-injection determination of glutathione with, 245

Fiber optic biosensing
  based on molecular recognition, 1
Fire and gas leak prevention system
  simple type of, using Sn oxide gas sensors, 227

Elsevier Sequoia, Lausanne

Fluorine
characteristics of thin-film LaF_3 solid electrolyte for oxygen sensing, 149

Gallium
oxygen sensing with long-term stable Ga_2O_3 thin films, 115
Gas catalytic microsensor
thin-film, 33
Gas leak prevention system
simple type of fire and, using Sn oxide gas sensors, 227
Gas sensor(s)
computational enhancement of MOS, selectivity, 193
detection and measurements of odor by sintered Sn oxide, 27
enhancement of MOS gas sensor selectivity by 'on-chip' catalytic filtering, 231
new approaches for improving semiconductor, 7
new-type calorimetric, using temperature characteristics of piezoelectric quartz crystal fitted with noble metal catalyst film, 211
new type of CO_2, based on capacitance changes, 97
planar integrated chlorinated hydrocarbon, on Si substrate, 199
selective solid-state, for halogenated hydrocarbons, 109
simple type of fire and gas leak prevention system using Sn oxide, 227
stabilization of SnO_2 sintered, 205
surface chemistry of; H_2S on WO_3 films, 155
thin-film, with organically modified silicates for measurement of SO_2, 219
Glucose sensor(s)
electroenzymatic, fabricated on flexible substrate, 139
ISFET, for undiluted serum sample measurement, 237
Glutathione
calorimetric flow-injection determination of, with enzyme-thermistor detector, 245
Graphoepitaxy
CdS films obtained by, and investigation of some of their properties, 257

Halogenated hydrocarbons
selective solid-state gas sensor for, 109
Humidity sensing properties
and electrical permittivity of new photosensitive polyimides, 161
Humidity sensitivity
of $Pd/SiO_2/Si$ sensor, 187
Humidity sensor
using NASICON not containing P, 135
Hydrogen
behaviour of hydrogen, nitrogen and oxygen impurities in B carbide and Al dodecaboride, 261
system to detect, in water, 185
Hydrogen sensor(s)
$CaZrO_3$-type hydrogen and steam sensors; trial fabrication and their characteristics, 145
new technique for preparation of highly sensitive, based on $SnO_2(Bi_2O_3)$ thin films, 253
novel $Pd\text{-}SiN_xO_y$ hydrogen sensor of high stability and sensitivity, 181
Hydrogen sulfide
H_2S monitoring as air pollutant with Ag-doped SnO_2 thin-film sensors, 21
surface chemistry of gas sensors; H_2S on WO_3 films, 155

Industry
implementing chemical sensors in; novel approaches, 75
Interdigital capacitors
two-dimensional and three-dimensional, as basic elements for chemical sensors, 223
Interdigitated gate electrode field-effect transistor
selective detection of nitrogen dioxide and diisopropyl methylphosphonate with IGEFET, 37
Iridium oxide
as actuator material for ISFET-based sensor–actuator system, 47
thin-film stability in high-temperature corrosive solutions, 165
ISFETs
with covalently bound monolayer membrane; example of Ca detection, 67
glucose sensor for undiluted serum sample measurement, 237
Ir oxide as actuator material for ISFET-based sensor–actuator system, 47

Lanthanum
characteristics of thin-film LaF_3 solid electrolyte for oxygen sensing, 149
Lipids
odorant sensor using lipid-coated SAW resonator oscillator, 53

Microelectrochemical amperometric sensors
universal on-wafer fabrication technique for diffusion-limiting membranes for use in, 71
Microsensor
thin-film gas catalytic, 33
Molecular recognition
fiber optic biosensing based on, 1
MOS gas sensor selectivity
computational enhancement of, 193
enhancement of, by 'on-chip' catalytic filtering, 231

NASICON
humidity sensor using, not containing P, 135
Nitric oxide
surface chemistry and electronic effects of O_2, NO and NO/O_2 on SnO_2, 189
Nitrogen
behaviour of hydrogen, nitrogen and oxygen impurities in B carbide and Al dodecaboride, 261
Nitrogen dioxide
selective detection of, and diisopropyl methylphosphonate with IGEFET, 37
Noble metal catalyst film
new-type calorimetric gas sensor using temperature characteristics of piezoelectric quartz crystal fitted with, 211

Odor
detection and measurements of, by sintered Sn oxide gas sensor, 27

development of quantitative odor supplier for plant leaf sensor system, 129
Odorant sensor
using lipid-coated SAW resonator oscillator, 53
On-wafer fabrication technique
universal, for diffusion-limiting membranes for use in microelectrochemical amperometric sensors, 71
Optical fibre refractometer
simple intrinsic, 173
Organic compounds
potentiometric response of PVC/crown ether membrane electrodes to nonionic, 171
Oxygen
behaviour of hydrogen, nitrogen and oxygen impurities in B carbide and Al dodecaboride, 261
surface chemistry and electronic effects of O_2, NO and NO/O_2 on SnO_2, 189
Oxygen sensing
characteristics of thin-film LaF_3 solid electrolyte for, 149
with long-term stable Ga_2O_3 thin films, 115

Palladium
novel Pd-SiN_xO_y hydrogen sensor of high stability and sensitivity, 181
sensitivity of $Pd/SiO_2/Si$ sensor to humidity, 187
Piezoelectric quartz crystal
new-type calorimetric gas sensor using temperature characteristics of, fitted with noble metal catalyst film, 211
Plant leaf sensor system
development of quantitative odor supplier for, 129
Platinum
fabrication and characterization of Pt/ceramic electrochemical sensor, 121
Polyimide films
and adhesion using surface acoustic wave sensor, 59
Polyimides
humidity sensing properties and electrical permittivity of new photosensitive, 161
Potentiometric response
of PVC/crown ether membrane electrodes to nonionic organic compounds, 171
PVC/crown ether membrane electrodes
potentiometric response of, to nonionic organic compounds, 171

Refractometer
simple intrinsic optical fibre, 173

Silicon
novel Pd-SiN_xO_y hydrogen sensor of high stability and sensitivity, 181
planar integrated chlorinated hydrocarbon gas sensor on Si substrate, 199
sensitivity of $Pd/SiO_2/Si$ sensor to humidity, 187
Silver
H_2S monitoring as air pollutant with Ag-doped SnO_2 thin-film sensors, 21
Solid-state gas sensor
selective, for halogenated hydrocarbons, 109
Steam sensors
$CaZrO_3$-type hydrogen and steam sensors; trial fabrication and their characteristics, 145
Sulfur dioxide
thin-film gas sensors with organically modified silicates for measurement of, 219
Surface acoustic wave resonator oscillator
odorant sensor using lipid-coated, 53
Surface acoustic wave sensor
polyimide films and adhesion using, 59
Surface chemistry
and electronic effects of O_2, NO and NO/O_2 on SnO_2, 189
of gas sensors; H_2S and WO_3 films, 155
Surface plasmon resonance
bioanalysis with, 79

Tin dioxide
equilibrium and non-equilibrium conductance response of sintered SnO_2 samples to CO, 103
H_2S monitoring as air pollutant with Ag-doped SnO_2 thin-film sensors, 21
new technique for preparation of highly sensitive hydrogen sensors based on $SnO_2(Bi_2O_3)$ thin films, 253
stabilization of SnO_2 sintered gas sensors, 205
surface chemistry and electronic effects of O_2, NO and NO/O_2 on SnO_2, 189
Tin oxide
detection and measurements of odor by sintered Sn oxide gas sensor, 27
simple type of fire and gas leak prevention system using Sn oxide gas sensors, 227
Tungsten
surface chemistry of gas sensors; H_2S on WO_3 films, 155

Urea
analytical application of immobilized acid urease for, in flow streams, 241

Zirconium
$CaZrO_3$-type hydrogen and steam sensors; trial fabrication and their characteristics, 145
